DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group Vii, Claims 1, 16, 17, 19-25, 27, 28, 30 in the reply filed on 01-12-06 is acknowledged.

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Note the use of the expression "means". Further, the expressions palletfor (line 1), "palletcomprises" (line 4) are confusing and unclear. Clarification and correction are required.

In the specification, reference number 110 is used to reference both armature and shaft. See paragraph 0093. Further, reference numeral 2 is used to reference both base and basis. Clarification and correction are required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 10/604,641

Art Unit: 3637

Claims 16, 17, 19, 20, 21, 22, 23, 24, 25, 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The expressions "said means for bearing" (claim 16) "the mutual approaching" (claim 20) have no definite antecedent basis in the claims. Claim(s) 20 fail(s) to recite sufficient structural elements and interconnection of the elements to positively position and define how the actuating means causes "mutual" approaching and/or moving away of first and second support means so that an integral structure able to function as claimed is recited.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 16, 17, 19, 20,22, 24, 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Kirker. The patent to Kirker teaches structure as claimed including a pallet comprising a base and support means (36, 44), the support means capable of moving toward or away from each.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

⁽a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/604,641

Art Unit: 3637

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 21, 25, 28, 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kirker. The patent to Kirker teaches structure substantially as claimed, as discussed above including actuating means (fig. 2) the only difference being that the actuation means is not a pneumatic type. However, the use of different conventional alternative actuating means, such as pneumatic structures, geared structures, screw threaded structures in the same intended well known purpose are matters of desirability and choice and would have been and well within the level of ordinary skill in the art at the time of the invention, thereby providing structure as claimed. The method would have been obvious in view of the structures.

Allowable Subject Matter

Claim 23 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Application/Control Number: 10/604,641

Art Unit: 3637

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Santandrea, Bond ('821), Bond ('485), Nakamura, teach structure similar to applicant's.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to José V. Chen whose telephone number is (571)272-6865. The examiner can normally be reached on m-f,m-th 5:30am-3:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lanna Mai can be reached on (571)272-6867. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
